## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11 & 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Todack (US Patent No. 5,535,596). Todack discloses a refrigerant reclamation and purification apparatus and method and comprising: an apparatus (5), a separation chamber (16), a contaminated waste product sump (22), oil-mist eliminators / demister screen pads (23A, 23B & 23C) and a drain outlet (25). During vaporization the bulk of the contaminates are separated from the refrigerant and fall into a sump and the vapor is redirected and drawn through de-misting screens which strips remaining contaminates from the vapor. Furthermore heat is used to vaporize incoming liquid refrigerant and residual refrigerant form the waste contaminates (see column 3).

## Allowable Subject Matter

Claims 1-10 are allowed over the prior art of record.

Claims 12-16, 20 & 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
